>Hello, Mr., Breitenbach,
>Please assure that your agency helps to improve overall water quality by
>enforcing anti-pollution laws to the fullest extent possible.
>Assure that your agency bases water needs on realistic estimates of
>future needs, rather than dire demands.
>Assure that your agency progresses with its removal of various dams, in
>order to increase natural stream flows.
>Assure that your agency maximizes water usage efficiency, and water
>conservation.
>Assure that your agency no longer counts on the building of new dams or
>storage reservoirs.
>In these ways you can help the State to realistically restore the
>habitat loss caused by human interventions in the past.
>Thanks for your attention. I will be grateful to for your response to
>my requests.
>Cheers,
>
